**DETAILED ACTION*****Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the central aperture disposed in a substantially central region of the cutting blade in claim 41 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Art Unit: 3724

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 41-43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "substantially central region" in claim 41 is a relative term which renders the claim indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. For example, it is unclear how far the central aperture is off the central region of the cutting blade.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 40-46 are rejected under 35 U.S.C. 102(b) as being anticipated by Matthai et al. (5,702,415), hereinafter Matthai.

Regarding claim 40, Matthai teaches a rotary trimmer comprising:

a blade carriage 13;

a cutting blade 9 having a plurality of apertures;

a hub (upper end of element 13) connected to the cutting blade 9;

a blade guard 80 securable to the hub.

See Fig. 2.

Regarding claims 41 and 42, a central aperture and a plurality of apertures are best seen in Fig. 1.

Regarding claim 43, a mounting structure is best seen in Fig. 2.

Regarding claim 44, see Fig. 2.

Regarding claim 45, a blade guard 80 is best seen in Fig. 1.

Regarding claim 46, the hub is best seen in Fig. 1.

6. Claims 20, 25 and 47 are rejected under 35 U.S.C. 102(b) as being anticipated by Elson (3,298,409).

Regarding claim 47, Elson teaches a rotary trimmer comprising:

a blade carriage 39;

a cutting blade 30;

a blade guard 36 secured to the cutting blade; and

a clip 10 for connecting the blade guard to the cutting blade.

See Figs. 9 and 12.

Regarding claim 25, a handle 32 is best seen in Fig. 8.

Regarding claim 20, an arcuate shaped handle 32 is best seen in Fig. 8.

#### *Response to Arguments*

7. Applicant's arguments with respect to claims 20, 25 and 40-47 have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 3724

8. Applicant's arguments with respect to the objections to the Drawings and the Specification and the rejections under 35 USC 112 1st and 2nd paragraphs have been fully considered and are persuasive. The objections to the Drawings and the Specification and the rejections under 35 USC 112 1st and 2nd paragraphs have been withdrawn.

***Conclusion***

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to PHONG H. NGUYEN whose telephone number is (571)272-4510. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Boyer Ashley can be reached on 571-272-4502. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
